

1. This is a bond fund.
2. Investing in this fund may expose investors to interest rate, credit, prepayment and exchange risks. The use of financial derivative instruments for hedging and efficient portfolio management purposes may lead to exposure to credit risk of the issuer. The fund may also be exposed to liquidity and developing countries risks.
3. The investment focus of the fund might give rise to increased risk over more diversified funds.
4. The value of the fund can be extremely volatile and could go down substantially within a short period of time. It is possible that your investment value could suffer substantial loss.
5. The investment decision is yours, but you should not invest in the product unless the intermediary who sells it to you has advised you that the product is suitable for you and explained why including how buying it would be consistent with your investment objective.

Amundi Funds Global Bond seeks to maximize potential returns by exploiting inefficiencies in and across major asset classes in the global bond market including but not limited to developed international bonds (OECD, supranational and credit bonds) and currencies. The Fund enjoys the benefits of its wide investment latitude to perform in all market environments.

- **An Unbiased Approach:** Aiming to get the most from global bonds in all market environments.
- **Diversify Exposure** whilst remaining an investment grade bond fund
- **Source of Alpha:** Combination of macro strategic views with active tactical management

** Ratings shown are in order of priority: Moody's, S&P, Fitch, Kroll, DBRS, and Morningstar. For the average portfolio credit rating, Moody's rating is used if available and US Treasury, senior Agency debt, and Agency MBS are treated as Aaa. Based on S&P's measures, AAA (highest possible rating) through BBB are considered investment grade. BB or lower ratings are considered non-investment grade. Cash equivalents and some bonds may not be rated. This is not a rating of the Portfolio's overall credit quality. The rating includes securities held in the portfolio that have not been rated by either of the rating agencies, which has the effect of reducing the overall average.
